

PERENNIAL RYEGRASS

Citation III

Turf Quality

Citation III has exceptionally dark green color, which stands out in both over-seeding and permanent turf trials.

Disease Resistance

Citation III has good resistance to stem rust and red thread. Contains endophyte for natural above-ground feeding insect resistance.

Key Characteristics

Rich, dark green color with enhanced resistance to stem rust and red thread. Citation III also has outstanding performance in all trials: over-seeding, California, Arizona and North Carolina.

Seeding Information

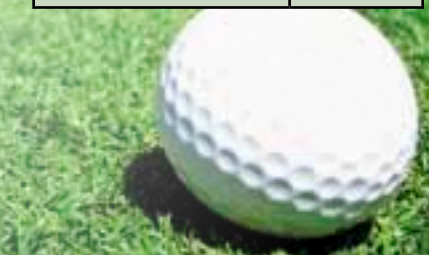

In most seeding applications a rate of 8 – 10 lbs per 1,000 sq. ft. is recommended.
