

## PERENNIAL RYEGRASS

### Turf Quality

iQ is a top performer in overall turf quality. It is characterized by a dark green color, high endophyte content and outstanding turf density. iQ is suitable for pure stand applications or as a blend component with other perennial ryegrass varieties.

### High Endophyte

Enhanced with 70% endophyte, which provides resistance to a number of leaf crown feeding pests.

### Gray Leaf Spot Resistance

iQ is an elite generation perennial ryegrass with enhanced gray leaf spot resistance. The strong disease resistance of iQ is further enhanced by excellent red thread resistance. Rest assured iQ will shine through in the heat of summer.

### Dark Green Color

Even the most demanding turf professionals will be impressed by iQ's dark green color. iQ is a leader in NTEP genetic colour ratings.

### Mean Turfgrass Quality

*NTEP 2000 – 2003 Data*

Name	Mean
Grand Slam	6.1
<b>iQ</b>	<b>5.8</b>
