

RIPTIDE

PERENNIAL RYEGRASS

Traffic Tolerance

Riptide excels under high traffic conditions, resulting in less plant death and higher turf quality.

Disease Resistance

Riptide has excellent stem and crown rust resistance ratings and broad adaptation through challenging environments.

Outstanding Turf Quality

Riptide consistently shows excellent turf quality including outstanding genetic color, fine leaf texture and a good disease package. Riptide shows exceptional turf quality in the Northwest region, but has consistently shown excellent turf quality in other regions as well.

Features

High traffic tolerance

Excellent stem and crown rust resistance

Outstanding genetic color

Fine leaf texture
