

PERENNIAL RYEGRASS

Wear Tolerance

Sunstreaker shines in high traffic conditions. Sunstreaker's excellent wear tolerance means it will maintain high quality turf longer in the face of high traffic situations.

Disease Resistance

Sunstreaker has outstanding resistance to gray leaf spot, one of the more damaging diseases to perennial ryegrass. It also has excellent resistance to pink snow mold to ensure persistence and quality through difficult conditions.

Outstanding Turf Quality

Sunstreaker consistently shows excellent turf quality including outstanding genetic color, fine leaf texture and a good disease package. Sunstreaker's combination of gray leaf spot resistance, wear tolerance and excellent turf quality make it an outstanding choice for a variety of environments and uses.

Features

Excellent wear tolerance

Outstanding gray leaf spot resistance

Excellent turf color

Fine leaf texture
