Trailburst Orchardgrass

TRAILBLAZING FORAGE YIELD, QUALITY AND PLANT HEALTH

FEATURES

Aggressive spring vigour and medium maturity

Wide leaves and tall plant height

Strong disease resistance package

High crude protein and relative feed value

Yield	Excellent
Forage Quality	Excellent
Disease Resistance	Very Good
Vigour	Very Good

Excellent > Very Good > Good > Poor

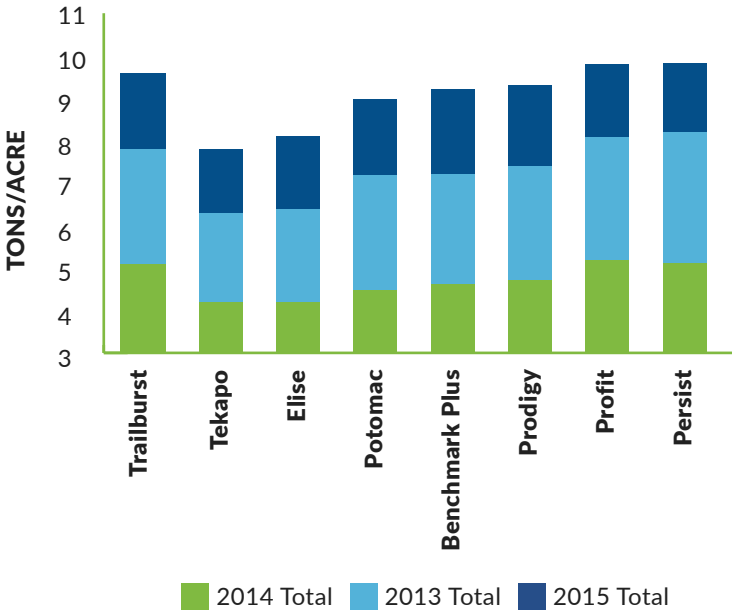
Forages

Trailburst is a high yielding orchardgrass developed with quality and plant health in mind. Its wide leaves and tall plant height deliver trailblazing forage quality, with medium maturity that is well adapted for most hay or pasture applications. Trailburst's dense network of fibrous roots provide good erosion control. Trailburst has shown high crude protein content and relative feed value that provides excellent forage quality.

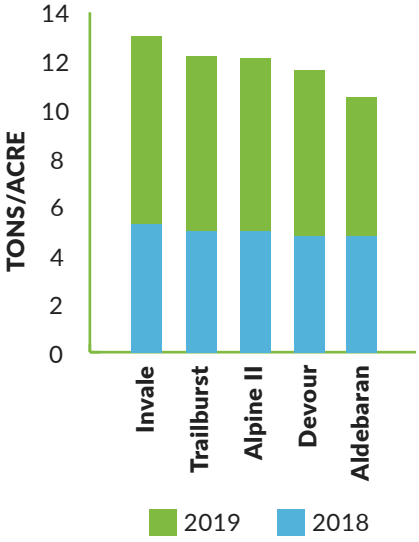
Trailburst was selected for vigour, stem rust resistance, and overall plant health. Seedlings were inoculated with stem rust spores in a greenhouse, the resistant seedlings were transplanted into a space plant field. Selections were made for spring vigor, plant health and high forage quality.

Dry Matter Yield

Forage Variety Trials: Lexington, Kentucky, 2015



Forage Variety Trials: Penn State, 2019



DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.
