

# BLEND 4440

## ALFALFA

### The Premier Certified Alfalfa Blend for the Canadian Prairies

Blend 4440 is a mixture of premium, certified alfalfas specifically developed to combine the strengths of our best varieties: high yields, superior winterhardiness, salt tolerance, multifoliolate expression, and unique rooting habits such as branch root, sunken crown and creeping root characteristics. The unique strengths of this blend offer suitability to a wide range of growing conditions. Demand the best, insist on Blend 4440 Alfalfa.

### Blend Composition

BLEND COMPOSITION	DESCRIPTION
<b>4010 BR</b> (Branch Root)	Root system that is up to 80% branched for optimum performance in poorly drained soils.
<b>4020 MF</b> (Multifoliolate)	High multifoliolate expression resulting in higher, softer-leaved feed value.
<b>3010</b> (Sunken Crown)	Deep-set crown protects from harsh winters, heavy machinery and animal traffic.
<b>Barricade SLT</b> (Salt Tolerant Tap Root)	Salt tolerant tap root has an outstanding disease package with high yields and is more persistent in salinity.
<b>2010</b> (Creeping Root)	Strong dormancy with exceptional winterhardiness and improved disease resistance. Prostrate growth habit tends to fill-in bare ground.

#### Key Features

- Certified alfalfa blend
- Premium varieties
- Widely adapted
- Persistent in adverse conditions
- High yield potential
- Excellent winter hardiness
