Insignia Pro fungicide
technology sheet

New Insignia® Pro fungicide combines two trusted active ingredients for long-lasting snow mould control.

- **Safety and peace of mind** – contains actives from two proven products you've trusted for years: Maxtima® and Insignia
  - Maxtima, powered by the unique binding action of Revysol®, binds to the plant and disease for enhanced control and performance
  - Insignia combines disease control and proven **Plant Health Benefits**[1] for better management of minor stress and increased growth effeciency[2] and sets up the turf to come out of the winter strong
- **Ease of use** – in a convenient premix

Active ingredient
Mefentrifluconazole – Group 3
Pyraclostrobin – Group 11

Formulation
Suspension concentrate

One package contains
2 x 2.53 L jugs

Storage
1. Store in original tightly closed container.
2. Store this product away from food or feed.
3. Store in cool, dry, locked, well-ventilated area without floor drain.

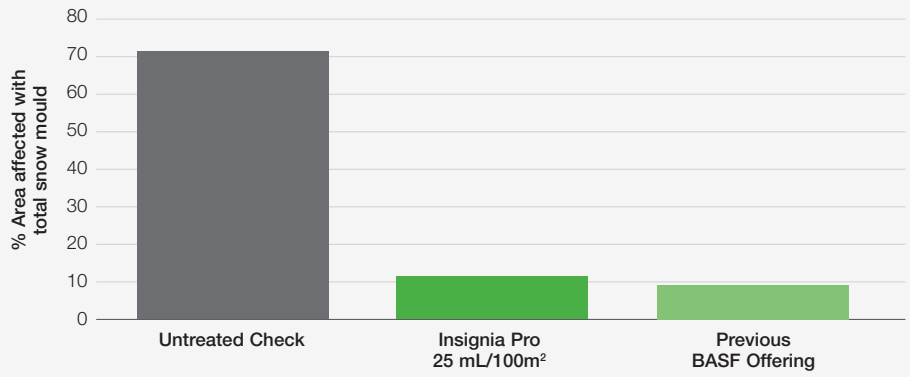
Crops
Turfgrass

Timing[3]
Apply preventatively, when conditions are favourable for disease, in rotation with non-Group 3 and 11 fungicides.

In high disease conditions, always tank mix with another active with snow mould on the label, such as fludioxonil.

Diseases controlled
Microdochium patch
Gray snow mould
Pink snow mould

Efficacy on Total Snow Mould*



*Total snow mould includes pink and grey species
Source: BASF Turf Fungicide Spring 2020, Barrie, ON

[1] Plant Health Benefits refer to products that contain the active ingredient pyraclostrobin.
[2] All comparisons are to untreated unless otherwise stated.
[3] See label for more details on timing and restrictions.

Fungicide

Application rates

One jug will treat 1.0 to 1.5 ha (2.5 to 3.7 acres)

Disease Controlled	Use Rate (mL/100m²)	Additional Instructions
Gray snow mould / Typhula blight (*Typhula incarnata, T. ishikariensis*)	17 – 25	Make a single application in late fall just prior to snow cover.
Microdochium patch (Fusarium patch) (*Microdochium nivale*)	25	Make a single application in the late fall just prior to snow cover.
Pink snow mould (*Microdochium nivale*)	25	Make a single application in the late fall just prior to snow cover.

Mixing order

1. Clean spray tank following sprayer clean-up recommendations on the previous product label.
2. Fill the spray tank one-half full of water and start agitation.
3. Add the required amount of **Insignia Pro** to the tank.
4. Add the required amount of the tank mix partner, if required.
5. Continue agitation while filling the remainder of the spray tank.
6. After use, clean the spray tank according to label precautions.

Application tips

Rainfastness – 1 hour.

Restricted entry interval – until spray has dried.

Resistance management – To limit the potential for the development of resistance, where possible rotate the use of Insignia Pro or other Group 3 and Group 11 fungicides with different groups that control the same pathogens.

Tank mixes
