
New Insignia® Duo fungicide combines two liquid snow mold control products to provide Canadian superintendents with excellent control of grey and pink snow mold as well as more convenient handling and mixing.

Insignia® Duo

Fungicide

- Full rates of two effective snow mold control products
- Convenient co-pack of two liquid formulations for easy handling and mixing
- Economical

How Insignia Duo works

Insignia Duo uses two systemic active ingredients that are rapidly absorbed by the leaves to control snow mold by interfering with sterol and cell membrane biosynthesis and inhibiting fungal spore germination, mycelial growth and sporulation.

Diseases Controlled

- Pink snow mold
- Grey snow mold

Green treated with Insignia Duo and collars untreated. Clear Springs Golf Club.

Active Ingredient

Pyraclostrobin (Group 11) and
Triticonazole (Group 3)

Packaging

One case of Insignia Duo contains:
2.0 L of Insignia SC and 3.2 L of Premis®

We create chemistry

Insignia® Duo

Fungicide

Best Management Practices

Apply Insignia Duo once in late-fall or early-winter prior to snowfall

Rate:

- One case of Insignia Duo controls snow mold on 1 ha of golf course turf
 - Insignia SC: 20 mL/100 m²
 - Premis®: 32 mL/100 m²
- Water volume: 6-8 L / 100 m²

Rainfast: 1 hour

Re-entry interval: Once sprays have dried

Pink snow mold

Grey snow mold
