BY 5105CL A Leading Clearfield® Product with Clubroot Protection.

- 1st generation* Clubroot protection
- Blackleg resistance
- A new level of performance for the Clearfield segment
- Can be marketed under the Clearfield (non-GMO) canola premium programs

Features

Yield:	105% ¹	
Blackleg:	R - C	
Major Gene ID:	Rlm 3	
Clubroot:	R (1st generation* resistance)	
Harvestability:	Excellent	
Maturity:	+1.5 days ¹	

Disease Management Rating

- R = Resistant
- IT = Improved Tolerance
- ¹ Yield and maturity ratings based on relative to check performance in Co-op registration trials.
- * 1st generation resistance means resistant to pathotypes 2F, 3H, 5I, 6M and 8N (these are equivalent to pathotypes 2, 3, 5, 6, and 8 on the Williams' differential set).

DefendR[®] Genetic Traits

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and a promise to canola growers that they are purchasing a variety that has exceptional yield potential and leading genetics for disease and/or harvest management.
