

# Launcher Liquid Soybean

## EFFECTIVE AND EFFICIENT SOYBEAN INOCULANT

### FEATURES

Launcher Soybean is an economical liquid inoculant with two unique rhizobia strains for effective biological fixation of nitrogen for on-seed or in-furrow use.

#### High Concentration

Higher rhizobia concentration delivers more bacteria per seed at lower application rates.

#### Multiple Rhizobia Strains

Launcher contains two unique rhizobia strains for effective biological fixation of nitrogen.

#### All-In-One Liquid Formulation

The convenient all-in-one liquid formulation improves application accuracy versus peat formulation and eliminates the additional product handling and bridging concerns of granular products.

## INNOVATIVE BIOLOGICALS FOR NORTH AMERICAN FARMERS

Rizobacter is our inoculant partner. They're a world-leading agricultural microbiology company that investigates, improves, and commercializes innovative solutions for growers around the world. Rizobacter's commitment to biologicals means groundbreaking products that consistently increase your crop's productivity.

### DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.

**Canada's Largest Independent Seed Company**
