**A NEW LEVEL OF POD SHATTER RESISTANCE WITH BLACKLEG DEFENDR<sup>®</sup> PROTECTION**

## FEATURES

Contains a new genetic source of pod shatter resistance well suited to a direct harvest and delayed swathing system

DefendR-rated multigenic blackleg resistance

Excellent yield potential with mid-season maturity

<b>Yield</b>	101% <sup>1</sup>
<b>Blackleg</b>	R – AG (9% of Westar)
<b>Major Gene ID</b>	Rlm3, RlmS
<b>Standability</b>	Very Good
<b>Maturity</b>	Early – Mid
<b>Pod Shatter Tolerance Rating</b>	7.2 <sup>2</sup>

### DISEASE MANAGEMENT RATING

**R** = Resistant

<sup>1</sup> Yield and maturity ratings based on comparison to WCC/RRC check hybrids.

<sup>2</sup> The pod shatter tolerance rating is based on the Canola Council of Canada's shatter tolerance scale of 1 – 9. 1 = poor, 9 = excellent. Results may vary slightly on your farm due to environmental factors and management practices.

\* Next-generation resistance includes pathotypes covered by first generation resistance plus resistance to newer pathotypes such as 2B, 3A, 3D, and other prevalent pathotypes.

# DEFENDR<sup>®</sup>

## GENETIC TRAITS

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and is a promise to you that you're purchasing a hybrid with exceptional yield potential and leading genetics for disease and/or harvest management.

## Performance in 2022 Trials

Resistance Trait	Minimum Resistance Level	Hybrids
<b>POD DEFENDR</b>	A dependable level of shatter tolerance well suited to straight-cut or delayed swathing harvest systems. Pod DefendR-rated hybrids score a minimum of 7.0 on the Canola Council of Canada's canola shatter rating scale.	BY 7206LL BY 7204LL BY 7202LL BY 6219TF BY 6217TF BY 6211TF
<b>BLACKLEG DEFENDR</b>	Contains one or more major blackleg resistance genes that align with predominant blackleg race(s), combined with a strong R-rating for adult plant (quantitative) blackleg resistance.	BY 7206LL BY 6219TF BY 6217TF BY 6216TF BY 6214TF BY 6211TF BY 6204TF
<b>CLUBROOT DEFENDR</b>	Stacked first and next-generation clubroot resistant genes that provide protection against a broad array of established pathotypes like 3H and new pathotypes such as 2B, 3A, and 3D.	BY 7206LL BY 7204LL BY 7202LL BY 6219TF BY 6217TF BY 6216TF BY 6214TF

## DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.
