BrettYoung™
DISTINCT BY DESIGN

Forages

Our game-changing alfalfa variety is pumping up milk production. Through conventional techniques that are non-transgenic, breeders have developed a low fibre and high protein alfalfa suited for Western Canadian dairy producers. Focused improvements on the rate and extent of fibre digestion, coupled with increased crude protein content have shown a net impact of 2.5 or more pounds of milk per cow per day.

By The Numbers

- Improve animal intake by 5 to 10%
- Extent of fibre digestion by 5 to 10%
- Increase crude protein by 3 to 5%
- Potential increase of 2.5 or more pounds of milk per cow per day

DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.
