Pod, Clubroot, and Blackleg DefendR[®] Traits with Flexibility of the TruFlex[™] System

- Another BrettYoung canola hybrid with Pod DefendR - a shatter reduction trait
- DefendR-rated clubroot and blackleg resistance
- Medium-long maturity suitable for mid- and long-season zones
- TruFlex canola hybrid equipped with the latest in herbicide trait technology

Features

	A DECEMBER OF A	
Yield:	106% ¹	
Blackleg:	R – CE2	
Major Gene ID:	Rlm3, Rlm7	
Clubroot:	R (Next-generation* resistance)	
Standability:	Excellent	
Maturity:	+1.5 days ¹	

Disease Management Rating

R = Resistant

IT = Improved Tolerance

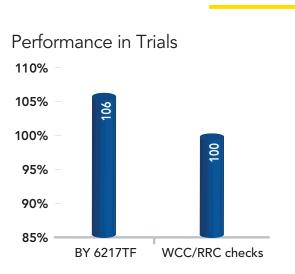

¹ Yield and maturity ratings based on comparison to WCC/RRC check varieties. *Next-generation resistance includes pathotypes covered by 1st generation resistance plus resistance to newer pathotypes such as 2B, 3A, 3D and other prevalent pathotypes.

See reverse for comparison trials and find us at:

DefendR[®] Genetic Traits

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and a promise to canola growers that they are purchasing a variety that has exceptional yield potential and leading genetics for disease and/or harvest management.
