

# Impactor Timothy

MAKE AN IMPACT ON YOUR RATIONS

## FEATURES

Dark green colour

Improved standability

Enhanced forage quality

Excellent disease resistance package

Selected for winterhardiness

<b>Spring Vigour</b>	Very Good
<b>Persistence</b>	Excellent
<b>Yield</b>	Excellent
<b>Summer Regrowth</b>	Very Good

Excellent > Very Good > Good > Poor

# Forages

Impactor is a high yielding, medium maturing timothy. It is characterized by a semierect growth habit, consistent dark green leaf color and large seed head. Powerful rust resistance and winterhardiness contribute to Impactor's quality and persistence – where it has shown good neutral detergent fiber digestibility (%NDFD) and consistent second cut performance. Well suited for pure stands and compaction hay market use. Impactor was selected for plant vigor, stem rust resistance, seed yield and winterhardiness. Parental plants were evaluated for weakness, winter damage and small or few panicles, plants exhibiting these characteristics were discarded.

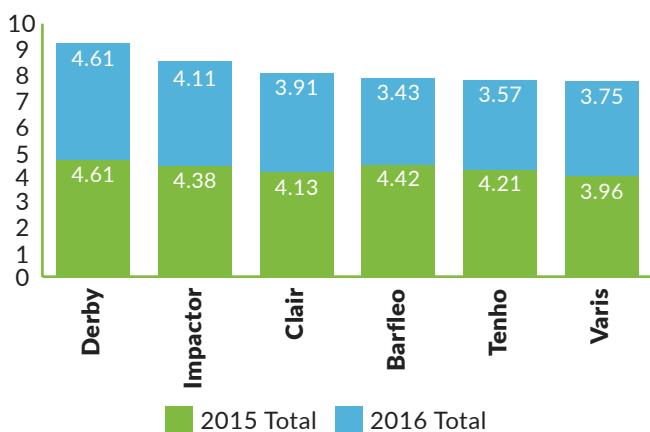

## Feed Quality

Cornell Spring Forage Quality, 2015

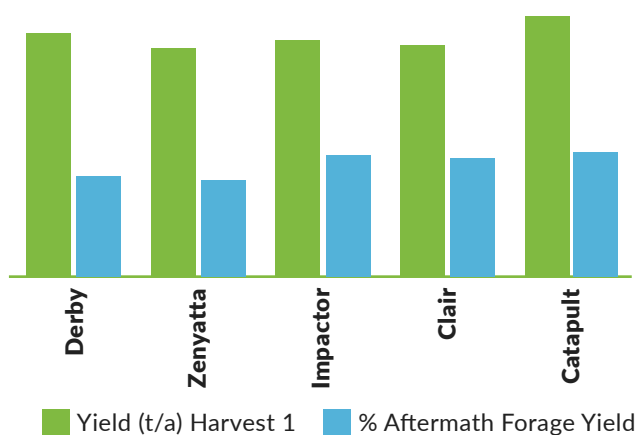

## Yield Performance

Dry Matter Yields (tonnes/acre), Lexington, KY

Cornell Forage Yield, 2014

### DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.
