Forages

Promesse Timothy is selected for its earlier maturing characteristics. It's well suited to the farmer looking for the advantages of Climax but with an earlier maturity. It's performed well in pasture mixes or blended with other forage crops when cutting for hay.

In dry matter tests, Promesse Timothy out-yielded other Timothy varieties, including Climax,by 5 to 10%. It grows well in a number of soil types and is highly resistant to leaf rust, leaf spot, and purple eyespot.
