

# BY 7204LL\*\*

THE FIRST IN OUR NEW GENERATION OF LIBERTYLINK® HYBRIDS. A HIGH YIELD POTENTIAL, MID-MATURITY HYBRID WITH POD DEFENDR® TECHNOLOGY AND NEXT-GENERATION CLUBROOT PROTECTION

## FEATURES

Pod DefendR – durable shatter resistance technology

DefendR-rated next-generation clubroot protection

Strong early season vigour and excellent standability

<b>Yield</b>	105% <sup>1</sup>
<b>Blackleg</b>	R – E <sub>2</sub>
<b>Major Gene ID</b>	Rlm7
<b>Clubroot</b>	R (next-generation* resistance)
<b>Standability</b>	Excellent
<b>Maturity</b>	- 0.5 days <sup>1</sup>
<b>Pod Shatter Tolerance Rating</b>	7.5 <sup>2</sup>

## DISEASE MANAGEMENT RATING

R = Resistant

<sup>1</sup> Yield and maturity ratings based on comparison to WCC/RRC (L255PC/45H33) check hybrids.

<sup>2</sup> The pod shatter tolerance rating is based on the Canola Council of Canada's shatter tolerance scale of 1 – 9. 1 = poor, 9 = excellent. Results may vary slightly on your farm due to environmental factors and management practices.

\* Next-generation resistance includes pathotypes covered by first generation resistance plus resistance to newer pathotypes such as 2B, 3A, 3D, and other prevalent pathotypes.

\*\*Pending registration

# DEFENDR<sup>®</sup>

## GENETIC TRAITS

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and is a promise to you that you're purchasing a hybrid with exceptional yield potential and leading genetics for disease and/or harvest management.

## Performance in 2023 MAX Plot Trials

Resistance Trait	Minimum Resistance Level	Hybrids	
	A dependable level of shatter tolerance well suited to straight-cut or delayed swathing harvest systems. Pod DefendR-rated hybrids score a minimum of 7.0 on the Canola Council of Canada's canola shatter rating scale.	BY 7204LL BY 6217TF BY 6211TF	
	Multi-genic (multiple major genes) resistance to blackleg and a strong R rating for adult plant blackleg resistance.	BY 6217TF BY 6216TF BY 6214TF	BY 6211TF BY 6204TF BY 7102LL
	Stacked first and next-generation clubroot resistant genes that provide protection against a broad array of established pathotypes like 3H and new pathotypes such as 2B, 3A, and 3D.	BY 7204LL BY 7102LL BY 6217TF	BY 6216TF BY 6214TF BY 6207TF

## DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.

Canada's Largest Independent Seed Company

## Add-On Seed Treatment Options
