Forages

CDC Torsion is a new Meadow Bromegrass developed by the Crop Development Centre at the University of Saskatchewan. It was selected for high yield and rapid regrowth and it features excellent winterhardiness with broad adaptability. In regional trials across Saskatchewan, CDC Torsion yielded 6% greater than Fleet Meadow Bromegrass with similar maturity.

2018-19 Forage Dry Matter Yield – Saskatchewan (kg/ha)

DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics.
