

**INTRODUCING A NEW WAY TO PROTECT
YOUR GREENS THIS WINTER:**

**THINK ONCE.
THINK ICE ARMOUR.**

Roll back your covers next spring on healthy greens with Ice Armour System's™ industry-leading three-layer solution customized for your course. Through the combination of exclusive GreenJacket® covers, Futerra® 7020 matting and tube-venting, the Ice Armour System™ insulates your greens and blocks moisture while still letting air flow in and out. It's a one-stop solution to healthier turf.

THE BEST CHOICE FOR YOUR GREENS

Never has protecting your most valuable asset – your greens – been easier. Why?

Straightforward: With step-by-step directions and the BrettYoung team to coach you along the way, the path to healthier greens is clear. Every Ice Armour System™ comes with a detailed guide and year-round support from your BrettYoung representative. Together, let's take some of the guesswork out of winter protection.

Long-lasting: All the materials included in the Ice Armour System™ are durable and built to last. It's an excellent investment for your course and for your future peace of mind.

The perfect environment for your greens: No more worrying about removing and disposing of flax straw, clearing snow or trying to aerate through ice in January. Our three-layer system works double duty, giving your greens the airflow they need through an innovative tubing system, while also keeping out moisture. It's designed for Canadian winters, so whatever Mother Nature throws at you, head into spring with turf as healthy as it went in.

Customizable: We'll work with you to make sure your new Ice Armour System™ is the perfect fit for your greens. There is no course quite like yours, so there's no one-size-fits-all cover solution. Our sales team will make sure that your System™ is the right size to get the job done. All three layers can be cut to specifications, so your greens are completely covered.

BOOK YOUR CONSULTATION

Your greens are the most important part of your golf course, so we're invested in them too. Contact one of our BrettYoung representatives for more details on the Ice Armour System™ or for a custom quote for your greens.

ICE ARMOUR™ IN ACTION

"I've been using GreenJacket® impermeable turf covers since 2007, in 2016 we added Futerra® 7020 matting to our system on our 14th green. The next season all 18 holes and our putting green had Futerra® 7020 matting. I'm always looking to improve our tarping system and BrettYoung is always on the cutting edge. Their Ice Armour System™ is proof."
