**A TRUFLEX® CANOLA HYBRID FEATURING POD SHATTER TOLERANCE AND NEXT-GENERATION CLUBROOT RESISTANCE THAT DELIVERS STRONGER YIELDS AND SUPERIOR HARVEST SECURITY IN AN EARLY-MID MATURITY PACKAGE**

## FEATURES

Pod DefendR shatter reduction technology

An early-mid maturity profile making it broadly adapted to most canola production regions

DefendR-rated next generation clubroot resistance

<b>Blackleg</b>	<b>R</b>
<b>Major Gene ID</b>	Rlm7, RlmS
<b>Clubroot</b>	<b>R</b> (next-generation* resistance)
<b>Standability</b>	Excellent
<b>Maturity</b>	Early – Mid <sub>1</sub>
<b>Pod Shatter Tolerance Rating</b>	7.1 <sup>2</sup>

## DISEASE MANAGEMENT RATING

**R** = Resistant

<sup>1</sup> Maturity ratings based on comparison to DK900TF.

<sup>2</sup> The pod shatter tolerance rating is based on the Canola Council of Canada's shatter tolerance scale of 1 – 9. 1 = poor, 9 = excellent. Results may vary slightly on your farm due to environmental factors and management practices.

\* Next-generation resistance includes pathotypes covered by first generation resistance plus resistance to predominant pathotypes such as 3A, 3D, 3H, and other relevant pathotypes.

# DEFENDR®

## GENETIC TRAITS

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and is a promise to you that you're purchasing a hybrid with exceptional yield potential and leading genetics for disease and/or harvest management.

## Performance in 2024 Trials

Resistance Trait	Minimum Resistance Level	Hybrids
<b>POD DEFENDR®</b>	A dependable level of shatter tolerance well suited to straight-cut or delayed swathing harvest systems. Pod DefendR-rated hybrids score a minimum of 7.0 on the Canola Council of Canada's canola shatter rating scale.	<div>BY 7206LL</div> <div>BY 7204LL</div> <div>BY 7203LL</div> <div>BY 7202LL</div> <div>BY 6223TF</div> <div>BY 6217TF</div> <div>BY 6211TF</div>
<b>BLACKLEG DEFENDR®</b>	Contains one or more major blackleg resistance genes that align with predominant blackleg race(s), combined with a strong R-rating for adult plant (quantitative) blackleg resistance.	<div>BY 7206LL</div> <div>BY 7203LL</div> <div>BY 6222TF</div> <div>BY 6217TF</div> <div>BY 6216TF</div> <div>BY 6214TF</div> <div>BY 6211TF</div>
<b>CLUBROOT DEFENDR®</b>	Stacked 1st and next-generation clubroot resistance genes that protect against the prevalent pathotypes (3A, 3D, and 3H). Clubroot DefendR also protects against common (8E, 8N, 8P), and frequent (5C, 5G, 5L, 8A, and 8D) pathotypes, and against many other infrequent, rare, and new pathotypes.	<div>BY 7206LL</div> <div>BY 7204LL</div> <div>BY 7203LL</div> <div>BY 7202LL</div> <div>BY 6223TF</div> <div>BY 6222TF</div> <div>BY 6217TF</div> <div>BY 6216TF</div> <div>BY 6214TF</div>

## DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.

Canada's Largest Independent Seed Company
