**A MID MATURITY HYBRID WITH FULL SEASON
YIELD PERFORMANCE AND DEFENDR®-RATED
CLUBROOT AND BLACKLEG PROTECTION**

FEATURES

Pod integrity that is suitable for delayed swathing

DefendR-rated next-generation clubroot protection

A unique blackleg major resistance gene effective against predominant blackleg races

Mid-maturity suitable for mid- and long-season zones

Blackleg	R – E ₂
Major Gene ID	Rlm7
Clubroot	R (next-generation* resistance)
Standability	Very Good
Maturity	Mid – Full ₁
Pod Shatter Tolerance Rating	5.1 ²

DISEASE MANAGEMENT RATING

R = Resistant

¹ Maturity ratings based on comparison to WCC/RRC check hybrids.

² The pod shatter tolerance rating is based on the Canola Council of Canada's shatter tolerance scale of 1 – 9. 1 = poor, 9 = excellent. Results may vary slightly on your farm due to environmental factors and management practices.

* Next-generation resistance includes pathotypes covered by first generation resistance plus resistance to newer pathotypes such as 2B, 3A, 3D, and other prevalent pathotypes.

DEFENDR®

GENETIC TRAITS

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and is a promise to you that you're purchasing a hybrid with exceptional yield potential and leading genetics for disease and/or harvest management.

Performance in 2022 Trials

Resistance Trait	Minimum Resistance Level	Hybrids
	A dependable level of shatter tolerance well suited to straight-cut or delayed swathing harvest systems. Pod DefendR-rated hybrids score a minimum of 7.0 on the Canola Council of Canada's canola shatter rating scale.	<div>BY 7206LL</div> <div>BY 7204LL</div> <div>BY 7203LL</div> <div>BY 7202LL</div> <div>BY 6223TF</div> <div>BY 6217TF</div> <div>BY 6211TF</div>
	Contains one or more major blackleg resistance genes that align with predominant blackleg race(s), combined with a strong R-rating for adult plant (quantitative) blackleg resistance.	<div>BY 7206LL</div> <div>BY 7203LL</div> <div>BY 6222TF</div> <div>BY 6217TF</div> <div>BY 6216TF</div> <div>BY 6214TF</div> <div>BY 6211TF</div>
	Stacked 1st and next-generation clubroot resistance genes that protect against the prevalent pathotypes (3A, 3D, and 3H). Clubroot DefendR also protects against common (8E, 8N, 8P), and frequent (5C, 5G, 5L, 8A, and 8D) pathotypes, and against many other infrequent, rare, and new pathotypes.	<div>BY 7206LL</div> <div>BY 7204LL</div> <div>BY 7203LL</div> <div>BY 7202LL</div> <div>BY 6222TF</div> <div>BY 6217TF</div> <div>BY 6216TF</div> <div>BY 6214TF</div>

DISTINCT BY DESIGN

At BrettYoung we are proud of the strategic partnerships we have with world-class organizations through which we source leading technologies and genetics. This allows us to bring **distinct** market choices that deliver you performance and value. **By design**, our success will always be rooted within your success. Like you, we are independent, resolute, and **Distinct By Design**.
