UNLEASH THE FULL POTENTIAL OF TRUFLEX® – DESIGNED WITH MODERATE POD SHATTER CONTROL IDEAL FOR DELAYED SWATHING, CUTTING – EDGE CLUBROOT CONTROL AND ADVANCED BLACKLEG DEFENSE

FEATURES

A high-yielding early - mid maturity hybrid

Enhanced Pod integrity, delivering versatility for both delayed swathing and straight-cut harvesting

Double-layered Clubroot and Blackleg DefendR® traits

Blackleg	R – C, G
Major Gene ID	Rlm3, LepR2
Clubroot	R (next-generation* resistance)
Standability	Excellent
Maturity	Early – Mid ₁
Pod Shatter Tolerance Rating	7.0 ²

DISEASE MANAGEMENT RATING

R = Resistant

¹ Maturity ratings based on comparison to DK900TF.

² The pod shatter tolerance rating is based on the Canola Council of Canada's shatter tolerance scale of 1 – 9. 1 = poor, 9 = excellent. Results may vary slightly on your farm due to environmental factors and management practices.

* Stacked 1st and next-generation clubroot resistance genes that provide protection against the predominant pathotypes 3A, 3D, and 3H. They also protect against other less common pathotypes such as 8E, 8N, 8P, 9E, 8A, 5L, 5G, 8D, and 5C, and against many other rarely found pathotypes.

DEFENDR®

GENETIC TRAITS

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and is a promise to you that you're purchasing a hybrid with exceptional yield potential and leading genetics for disease and/or harvest management.

Performance in 2025 BrettYoung Comparison Trials* (BCT's)

*7 field scale locations

Resistance Trait	Minimum Resistance Level	Hybrids
	A dependable level of shatter tolerance well suited to straight-cut or delayed swathing harvest systems. Pod DefendR-rated hybrids score a minimum of 7.0 on the Canola Council of Canada's canola shatter rating scale.	BY 7206LL BY 7204LL BY 7203LL BY 7202LL BY 6222TF BY 6223TF BY 6217TF BY 6211TF
	Contains one or more major blackleg resistance genes that align with predominant blackleg race(s), combined with a strong R-rating for adult plant (quantitative) blackleg resistance.	BY 7206LL BY 7203LL BY 6222TF BY 6217TF BY 6216TF BY 6214TF BY 6211TF
	Stacked 1st and next-generation clubroot resistance genes that protect against the prevalent pathotypes (3A, 3D, and 3H). Clubroot DefendR also protects against common (8E, 8N, 8P), and frequent (5C, 5G, 5L, 8A, and 8D) pathotypes, and against many other infrequent, rare, and new pathotypes.
