## DISEASE MANAGEMENT RATING

**R** = Resistant

<sup>1</sup> Maturity ratings based on comparison to BY 7204LL.

<sup>2</sup> The pod shatter tolerance rating is based on the Canola Council of Canada's shatter tolerance scale of 1 – 9. 1 = poor, 9 = excellent. Results may vary slightly on your farm due to environmental factors and management practices.

\* Stacked 1st and next-generation clubroot resistance genes that provide protection against the predominant pathotypes 3A, 3D, and 3H. They also protect against other less common pathotypes such as 8E, 8N, 8P, 9E, 8A, 5L, 5G, 8D, and 5C, and against many other rarely found pathotypes.

# DEFENDR®

## GENETIC TRAITS
