FOOTHOLD II
ALFALFA

Exceptional Winter Hardiness. Lasting Persistence.

Foothold II Alfalfa is an exceptionally winter-hardy, creeping-rooted variety developed for dryland hay and pasture production. Its rhizomatous root system allows plants to spread outward from the crown, filling in bare areas and improving stand density. This spreading growth habit also helps Foothold II tolerate wetter soil conditions. With outstanding winter hardiness and excellent stand persistence, Foothold II delivers long-lasting productivity for hayfields and pastures.

Head to Head Dry Matter Yield (Tons/ac)

Key Characteristics

- Creeping rooted alfalfa
- Exceptional winterhardiness
- Ideal for dryland hay & pasture
- Excellent disease resistance
- Strong stand persistence

Winter Survival & Adaptation

Root Type	Creeping
Fall Dormancy	2
Winterhardiness	1
Disease Resistance Index	34/35

Disease

	RATING
Anthracnose	HR
